Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 December 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Applicant's amendment dated December 31, 2008, has been fully considered.

Applicant has amended the claims to include the "circuit path" to overcome the rejections in the previous Office Action. However, a new ground of rejection has been made based on a reference already of record, US 4498295 (Knoos).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-22, 26-28 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4498295 (Knoos).

Knoos discloses a power amplifier 10 comprising a cylinder having a pair of displacers 12, 16, said displacers being driven by a combination of a heater 30, a regenerator 20 and a cooler 36. The circuit path including the flow path through said heater, regenerator, cooler and displacer is bled off to drive a hydraulic turbine 124 at two different locations, one going through check valve 120 to drive the turbine fane 126, another coming out from valve 110 in connection with the regenerator 20 to drive the turbine impeller 128.

Regarding claim 22, note the control valves 110, 112.

Regarding claims 26-27, note the turbine 124 is a hydraulic turbine.

Regarding claim 28, not the accumulator 122 can be considered the tank as claimed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23-25, are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 4498295 (Knoos). Knoos discloses all the claimed subject matter as set forth above in the rejection of claim 20, but does not disclose the specific frequency and the force balancer at the connection, plus the separate machine is a linear motion energy converter. However, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to select any specific frequency to achieve appropriate power output, and to select different types of connection including force balancer for the purpose of achieving a balanced output, and to drive a linear motion energy converter for the purpose of producing a linear output.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3748

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
